

The world's most advanced water purifier now fits inline

What is it?

The Pure Hydration Inline filter is a personal water purifier capable of quickly turning up to 350L of

potentially contaminated water sources into clear, clean & safe drinking water.

From unregulated tap water in Nottingham to a mountain stream in Nepal, the Inline filter is all

you'll need to get your drinking water. Using the same innovative technology as our world renowned Aqua pure Traveller, our disinfection media - based on Electrohesion removes even the smallest viruses, as shown by independent testing. The Inline Filter can be fitted into the delivery tube of the majority of hydration packs, including Camelbak®, Source®, Platypus® and our own Aqua Clean Pack.

It removes:

- Pathogens (including Cryptosporidium & Giardia)
- Viruses & Bacteria
- Bad tastes & odours
- Chemicals (including VOCs, SOCs)
- Heavy metals
- Faecal matter

Why the Pure Hydration Inline?

This is the **only** inline filter fully endorsed by the Hospital of Tropical Diseases London.

We are an official partner of the Foreign & Commonwealth Office's 'Know before you go' campaign and our technology is approved for use by the UK MOD.
