

### **P-BAG SAP Super absorbent.**

**P-BAG SAP**, a more convenient and hygienic substitute for Bedpan and Bottle. Suitable for women and men.

**P-BAG SAP**, is a urine collecting plastic bag, equipped with a unique membrane which prevents leakage and bad odour. "P-BAG" SAP can easily replace all other as so called open urine container as bedpan and bottles etc. Both men and women can use "P-BAG" SAP at different kind of positions and situations. May be used in a sitting, lying down or standing position by man and women.

**P-BAG SAP**, has a unique handle for easy grasping, carrying and can be hanged up and reused several times up to a volume of 1.5 litres without leakage and bad odour. No odour emission is precluded by unique check valve system and a **unique plate of absorbent** which size will be reduced in accordance to incoming volume of urine = Fast absorbent up to a volume of 1,2 – 1,5 litres.

**P-BAG SAP**, gives a better working condition for the no risk of contamination from urine to staff, no more smell and bad odour, no more leaks as before from open bottles and bedpans etc. The waste of used / absorbed SAP is handled in the same way as handling of used diapers for adults without polluting the environment.

**P-BAG SAP**, is fully disposable - made from **Polyethylene** not **PVC** therefore more environmentally friendly. Moulded, jug especially for women.

**P-BAG SAP**, reduce a lot of working time for the staff and thereby decrease the costs for the hospital, institution etc.
